Single or Twin Signs

Each sign is 40cm or 20cm long. The 40cm signs can be split into two 20cm sides which can be separately, or jointly controlled, e.g. you can have a 40cm 'ON AIR' sign, or twin 2 x 20cm signs, such as 'ON AIR' and 'MIC LIVE'.

Dual Control Inputs

The sign can be controlled by either, or both, of 2 pull-low inputs, e.g. a single input can be used to control a single 'MIC LIVE' sign, or 2 inputs can be used to control a twin 'TX' and 'REH' sign with independent control of each side of the sign.

7V-36V DC Input Option

For a small additional cost, the SignalLED main circuit board can be modified to accept a DC input in the range 7V-36V, for example, if you have a 12V or 24V distributed DC power network.

When placing your order, or requesting a quotation, please either:

Change the 'LD' of the order code to 'LDD', so for example, 'LD-F1ONA' becomes 'LDD-F1ONA', or:

Add the item LD-DC to your order.

Flush or End Mounting

The sign is supplied as standard so that it can be mounted flush to a wall, e.g. for the 'TX' & 'REH' sign shown below. However, a mounting kit is available, LD-KE1, to mount the sign perpendicular to a wall, e.g. above a door, such as the ON AIR sign shown.

Simple Installation

The signs are supplied with a 6V DC power supply. Simply wire up your control signal(s) and DC input to the 'screw terminal block' inside the sign, route the cables through the integral cable clamp and mount the unit on the wall.

An installation tool, the LD-IT can be used to hold the sign in place on the wall mount whilst you wire it up.

The display mode and colour options are set-up using a separate remote control, the LD-RPC.

LD-RPC SignalLED Remote Programming Controller

The SignalLED signs are preconfigured to display certain colours when the control inputs are active. Information on the colours shown can be found on the Sonifex website. To vary the colours and switching modes, the LD-RPC Remote Programming Controller must be used. This allows a simple way of programming any sign using a hand-held remote control.

Please note that the control is sold separately and one LD-RPC can program multiple signs.

Custom Signs

Although a range of standard signs is supported, custom signs, for example with your company name or logo, can be produced for a nominal setup fee. Contact Sonifex with your requirements.
