

SHURE

XLR-TO-USB SINGLE-CHANNEL INTERFACE WITH HEADPHONE OUTPUT

MVX2U DIGITAL AUDIO INTERFACE

Easily connect any XLR microphone directly to your computer with the MVX2U. Ready to record or stream right out of the box with any dynamic or condenser microphone, this compact XLR-to-USB audio interface is perfect for podcasters, creators and musicians wanting to upgrade their sound with onboard DSP using the free ShurePlus™ MOTIV Desktop App.

FEATURES & BENEFITS

Make Your XLR Microphone Livestream Ready

Make your favorite dynamic or condenser XLR microphone ready for podcasting or livestreaming with the MVX2U. The XLR-to-USB adapter enables digital recording and streaming right out of the box with Auto Level Mode and phantom power already switched on.

Support for Dynamic and Condenser Microphones

Provides clean gain up to 60dB that is sufficient to amplify signals for dynamic microphones such as SM7B. Supplies 48v of phantom power for condenser microphones.

Upgrade Your XLR Microphone with DSP

The MVX2U unlocks the full feature set of the ShurePlus MOTIV Desktop App for your XLR microphone. Use Auto Level Mode to adjust your mic's gain automatically, while DSP options such as EQ, limiter, compression and more, are configurable in Manual Mode and can be saved as presets for future use.

Zero-latency Audio Monitoring and Playback

A built-in 3.5mm headphone jack with zero-latency monitoring ensures you get the desired audio output every time. Set your preferred blend of monitoring and playback from your microphone and device in the app with the Monitor Mix feature.

Versatile Setup

Whether you are connecting a vocal or instrument XLR microphone, the portable form factor with a sleek yet robust build can be plugged straight onto the XLR microphone or used in line with XLR cables depending on your desired setup.

Future-proof Your Audio

Firmware updates are available via ShurePlus MOTIV Desktop App to ensure you have access to the latest audio technologies from Shure.

Mac and Windows Compatible

Digital recording and streaming with XLR microphones is now effortless. Simply connect your computer with the included 1m USB-C to USB-C cable.
