

# SmartLed

TRIPLE AUDIO®

Give your studio that little something extra with SmartLed.

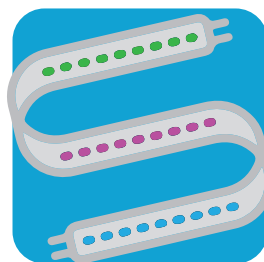

## Individually controllable

SmartLed manages an 'Addressable LED strip'. With this, every single light can turn on or off separately and have its own individual colour.

## SmartControl

SmartLed can be combined with SmartControl so that the LED strip responds to triggers from your studio.

## Adjustable

The LED strip offers a vibrant array of colours, allowing you to customize its lighting effects.

## Pretty

The LED strips can be tucked away neatly within studio furniture or alongside the edge of a mixer.

## Did you know...

Triple Audio makes its own custom studio furniture? The SmartLed LED strip can be easily incorporated.

## Complete package

Contains SmartLed Driver, SmartLed Server, LED strip, power supply and wiring.
